

CHOOSE YOUR ______ ON EW WEAPON

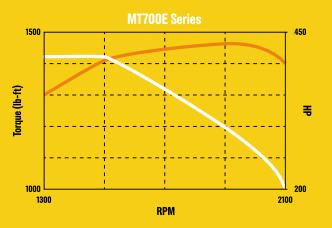

Introducing the Challenger MT700E & MT800E Series tractors, a new line of heavy-duty, high-horsepower rubber-tracked farm tractors designed to stretch the limits of productivity and performance. These new tractors are the result of decades of design and engineering leadership in rubber-belted track technology.

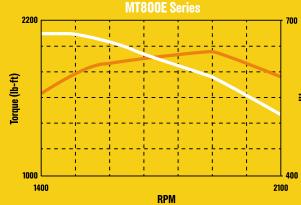

Model	Engine	Rated engine power HP(kW) @ 2,100 rpm	Max.power HP (kW) @ 1,900 rpm
MT755E	AGCO Power™ 9.8L	355 (261)	384 (282)
MT765E	AGCO Power™ 9.8L	381 (280)	411 (302)
MT775E	AGCO Power™ 9.8L	405 (298)	438 (322)

Model	Engine	Rated engine power HP(kW) @ 2,100 rpm	Max.power HP (kW) @ 1,900 rpm
MT845E	AGCO Power™ 16.8L	457 (336)	492 (362)
MT855E	AGCO Power™ 16.8L	496 (365)	536 (394)
MT865E	AGCO Power™ 16.8L	548 (403)	592 (435)
MT875E	AGCO Power™ 16.8L	598 (440)	646 (475)

A long, flat, sustainable torque curve means serious lugging ability. Power through tough spots without stalling. High torque at lower RPMs equals better productivity and efficiency.

Engine Power
Engine Torque

TORQUETHAT RISES TO THE OCCASION

The new AGCO POWER engines found in the MT700E and MT800E Series track tractors possess superior torque. By generating a greater torque rise over a wider range of RPMs, you get unmatched lugging ability for maximum productivity. Abandon the need to downshift or pull an implement out of the ground should the going get tough. With a higher sustained torque curve, you'll operate at lower RPMs to save on fuel while extending engine life.

How is this possible? Because all AGCO POWER engines are specifically designed from the ground up for ag applications – not retrofitted from an on-highway engine. Whether you arm yourself with the AGCO POWER 9.8L or 16.8L engine you'll cover more ground in less time so you'll never find yourself racing to beat sundown.

New AGCO POWER 9.8L and 16.8L engines deliver more horsepower and greater efficiency.

- New turbocharger packages provide excellent engine response and high torque at all engine RPMs
- Hits the power sweet spot for maximum efficiency
- Impressively long, flat torque curve and high torque rise at low RPMs
- Massive pulling power with minimal fuel consumption
- Backed by more than five years of rigorous field testing

AGCO POWER Engines

MT800E – 27.5" – 36" track offerings

General Agriculture, Extreme Agriculture and Extreme

TOUGH BROKER

IN-LINE DRIVETRAIN

The drivetrain on the Challenger MT700E & MT800E Series is designed and engineered to transfer the serious power of the engines to the ground-grabbing tracks. These aren't converted from a wheeled tractor powertrain. They're the strongest, most durable drivetrains in the industry.

It all starts with some hard-hitting parts: an AGCO POWER engine designed from the ground up for agricultural use, a proven CAT transmission and our unique Mobil-trac system to give you a reliable system that works together. As the original designer of the track tractor, we build upon the best design out there and keep our lead by continuing to improve it.

CAT POWERSHIFT TRANSMISSION

The MT700E and MT800E Series approach to power delivery is all about smooth moves. With new CAT Powershift software, you'll immediately take notice of smoother shifting. The results are less restriction for forward momentum and reduced power loss. Not only is this more efficient, but it improves the ride for less wear on the most important part of the tractor – the operator.

- Simple intuitive transmission control lever with up/down shift buttons
- Exclusive Power Management automatically shifts gears to maintain ground speed and minimise fuel consumption
- 16 Forward gears provide up to 40 km/h to minimise transport time

FACTORY ENGINEERED 3 METER CENTRES WITH FULL WARANTY

In-line frame design maximises total efficiency of power transfer from the engine to the transmission for unmatched power to the ground.

competitive air-bag suspension systems.

SERIOUS—EFFICIENCY

When it comes to hydraulics, Challenger steps up to today's demanding applications by greatly increasing your flow capacity. The MT700E and MT800E Series make it easier to get work done with a hydraulic system built for today's demanding implements. It starts with a design built around two pumps. The second pump kicks in only when the going gets tough, keeping the system efficient. At up to 321 litres per minute flow, there's enough pump capacity to handle the most hydraulically demanding implements.

Take advantage of up to 6 hydraulic remotes plus an available 3-point hitch. The MT700E and MT800E Series also come well-equipped with a closed-centre, load sensing, pressure-flow compensating (PFC) system and interchangeable valve couplers. Where Power Beyond* is fitted, you have the ability to provide continuous, full flow directly to meet the most demanding hydraulic requirements.

The MT700E and MT800E Series tractors both feature an ergonomically designed Pinnacle View Cab for a panoramic 360-degree view – putting you on the front row of productivity.

Settle into our new optional deluxe, vented-leather seat that maximises operator comfort with temperature controls and a wider range of adjustments. Power Management and hydraulic controls are conveniently positioned on the armrest control. As you glide through the field with oscillating midwheels and Marsh Mellow® springs under your cab, the air suspension seat beneath you is the icing on the cake making long days seem not quite so long.

*Power Beyond optional

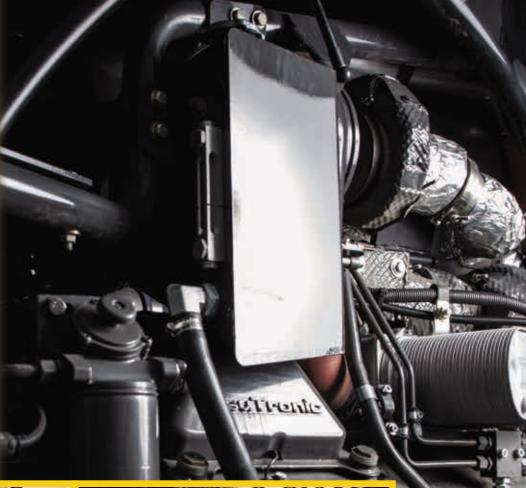

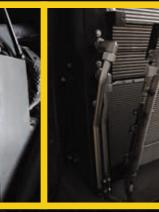

SERVICING MADE EASY

With the Challenger MT700E and MT800E Series tractors, routine maintenance is fast, straightforward and simple – in short, less stressful. They have convenient access points from the ground and an easy open bonnet. That means you don't waste time in the morning and get into the field faster.

The innovative on-board Tractor Management Centre (TMC) monitors long-term service intervals and alerts the operator when scheduled maintenance is due. The TMC screen provides diagnostics in both text and code.

Engine air filter is easily removed and conveniently positioned

Engine cooling package with easy-to-clean two-plane design

Engine oil can be checked and topped from ground level

IMPROVE EFFICIENCY WITH PRECISION TECHNOLOGY

FUSE TECHNOLOGIES

AGCO's global precision farming initiative brings together and optimises all of AGCO's current and future technology products and services including guidance, steering, telematics, diagnostics, application controls, yield metering, mobile apps and grain storage monitoring. Fuse Technologies supports growers throughout the entire crop cycle by maximising uptime and putting all farm assets in the right place at the right time. Learn more at www.AGCOtechnologies.com.

53.0

AGCO's AgCommand® is an industry-leading tool that allows wireless transfer of your vehicle data back to your office or mobile device. Access everything you need to optimise performance, monitor vehicle service intervals, monitor operating costs and generate easy-to-use information to drive efficiency and productivity. AgCommand®'s applications tell you where your machines are and what they're doing – putting you in complete control like never before.

The data is transferred to a secure internet site that can be viewed from your laptop, iOS phone or iOS tablet.

AUTO-GUIDE 3000

Auto-Guide 3000 is a complete, integrated autosteering system that works seamlessly with your AGCO vehicle terminal. It uses advanced satellite navigation and the TMC Display to steer the tractor, removing much of the tedium of field operations and leaving the operator free to focus their attention on optimising settings and monitoring work more closely. This highly advanced but simple-to-use system will help you reduce input costs as well as operator fatigue.

At the end of the day, significantly reduced operator fatigue equals increased accuracy and greater efficiency on the farm.

FUSE CONTACT CENTRE

The Global Fuse Contact Centre is a customer support resource open seven days a week that assists growers with setup, calibration and operational support on AGCO precision agriculture and machine communication technology products. Visit www.AGCOtechnologies.com/support for more information or call 1800 210 385 (Australia) or 0800 442 677 (New Zealand).
