VALTRA

**YOUR
WORKING
MACHINE**

YOUR WORKING MACHINE

Your land is your life.
Your farm is your foundation.
Your crop is your career.
Your tractor is the tool of your trade.

That's why it's a Valtra.
Like a craftsman's trusty tools, your Valtra gives you the confidence and the guts
to get the job done. Every day. Every time. In every working environment.

At Valtra, we have always chosen the path less walked – because where we come from,
that's how the paths are. We don't hesitate to walk the extra mile for you.
We do things like this because it's the best way to do them.
And because we believe in getting things done.

You don't compromise. Neither do we.

Get the job done.
Get a Valtra.
Your working machine.

IT'S ALL ABOUT YOU

Where we come from, we don't talk much. But we listen to our customers. You told us that the three most important reasons for selecting a Valtra are reliability, low total operating costs, and ease of use. That's how we built the fourth generation of Valtra tractors.

We have been building tractors for more than 60 years, and the T Series is the culmination of our experience so far. We designed it for the diverse requirements of farmers and the most demanding of conditions. We are proud of the result.

Your working machine is built around you. Enter the cab, start the engine and see what the Valtra T Series can do on your farm.

MAKE THREE WISHES AND GET IN THE DRIVER'S SEAT

If you could design and build a tractor, this is what it would look like. Many of the new T Series' unique features originated from our customers, because this tractor is the end result of discussions with hundreds of customers and thousands of hours of test driving.

Reliability

We stand behind the reliability of this tractor. The T Series has fewer parts than ever and went through 40,000 hours of test driving in extreme conditions. To ensure unrivalled reliability, we make all four of its major components in-house. The chassis, transmission and cab are Valtra's own design and engineering, and AGCO Power is the original Valtra engine that sets the reliability standard in our industry. The T Series is built for working in tough conditions - every day.

Ease of use

We made owning, operating and servicing your tractor easy so that you can concentrate on your work. The controls in the cab are located to minimise body movement, transmission operation is easy with a new drive lever, and the bright work lights let you keep working when night falls. We paid extra attention to the daily maintenance points, so that checking the oil and cleaning the filters take as little time as possible. The T Series is well suited for your work because many of its unique features were actually innovated by our customers.

Low total cost of ownership

The T Series isn't the cheapest tractor you can buy. But drive it for 10,000 hours and then you'll see the low total cost of ownership. For a start, we build your tractor for you, so you get only the features you need, factory installed and covered by the factory warranty. With AGCO Finance you tailor your financing costs. The 600 hour service interval reduces your maintenance costs and the SCR only AGCO Power engines give you the best overall fluid economy. Choose the T174 EcoPower model to save an additional 10% in fuel costs. Select PremiumCare and a service contract to secure your maintenance costs according to your annual running hours. And with genuine Valtra parts and 24/7 service you will get high resale value for your tractor. Valtra has one of the fastest parts delivery services in the industry to keep your working machine running, day in, day out.

It's made in Finland. We build more than 23,000 tractors a year and sell them in 75 countries, making us the market leader in Scandinavia and the fifth largest manufacturer in the western world. We have also been in Brazil since 1960, where we are the market leader in big tractors.

HIGHLIGHTS OF YOUR NEW WORKING MACHINE

Every detail of this tractor has been developed to improve your productivity. The T Series has been perfected by our engineers and tested by our customers. Come in for a test drive!

Comfort

1. The most comfortable 5-post cab
2. Intelligent cab frame with 365 Day visibility and over 6 m² window space
3. Pneumatic AIRES+ front axle suspension
4. Quiet working in the 5-post cab
5. 270° sweep windscreen wiper and heated front* and rear windows
6. Pneumatic AutoComfort cab suspension
7. Roof window
8. Electric TwinTrac reverse driving and 180° swiveling seat
9. Efficient LED lights
10. Safety camera

Power

11. AGCO Power 6.6 l or 7.4 l engine, up to 250 hp and 1000 Nm
12. EcoPower fuel saving model
13. Fuel efficient Tier 4 Final / Stage 4 engine with SCR only
14. 600 hour service interval
15. 380 l fuel tank, 70 l AdBlue tank
16. Pillar air intake for engine

Your working machine

17. 5 speed Powershift with Active and Versu, or Direct CVT
18. Electric 3-speed PTO with Sigma Power and ground speed PTO
19. Integrated 51 kN front lift and either a 81 kN or a 95 kN rear lift
20. Load-sensing hydraulics with 115 or 160 l/min pump capacity
21. Factory installed front loader and cast subframe
22. Best ground clearance on the market (60 cm)
23. Max total weight 13,500 kg
24. Turning radius 5.25 m
25. 4th generation functional Scandinavian design

* Available later

Illustrated specifications may be country specific.

THIS CAB IS YOUR COMFORT ZONE

Make yourself comfortable.
When it comes to productivity,
the driver is central, so we
never compromise on comfort,
safety and ergonomics.

T Series / 155 - 250 hp

How is all this possible?

The cab has a completely new frame and an innovative manufacturing process. It also has fewer parts and joints, making the cab structure very rigid and accurate in all 3D measurements. All this means that the cab fits like a glove. With its premium sound system, refrigerator and rear-view safety camera, the cab takes comfort to a whole new level. Just make three wishes and get into the driver's seat. The new cab is silent, secure, comfortable, and functional - your working machine.

You have more space where you need it, because the 5-post cab is convex. You have better visibility, with more than six square metres of window space. And you have more comfort and better control, both forward and in reverse using TwinTrac.

T Series / 155 - 250 hp

MORE SPACE, BETTER VISIBILITY, AND EVERYTHING UNDER CONTROL

365 Day Visibility Concept

You get the best possible visibility day or night, summer or winter, undertaking front loader work or reverse driving. The narrow pillars and exhaust pipe design help you see your work. The 270° sweep front wiper keeps the heated front windscreen clear in all conditions and you can see the front loader bucket easily through the roof window. Premium LED working lights give you light in all directions. With black panel mode you can dim the interior to maximise your visibility outside and the optional safety camera gives you an unimpeded view of the hitch or working device. Efficient air conditioning and two heaters keep the temperature comfortable even when it's -30 degrees outside.

Comfort and control

You notice the comfort as soon as you enter the cab – three steps and safe access through the wide-opening and soft-closing door. You have fingertip control of the new 5-speed powershift or Direct CVT, with a drive lever for driving and a joystick for controlling all tractor hydraulics. The cab has four seat options, from mechanical suspension to the Valtra Evolution seat with air conditioning and air suspension. Your co-driver also enjoys comfort and plenty of space. Two cab suspensions are available: luxury, semi-active pneumatic AutoComfort and a new mechanical suspension. The T Series has an all-new front axle with AIRES+ suspension that constantly monitors the ground and communicates with the AutoComfort cab suspension to make you feel as comfortable as possible.

Functional Scandinavian design

The cab has a unique shape to give you more space at shoulder and elbow height, but it is narrow at the front to keep the tractor as compact as possible. The convex windows optimise use of space, with over 6 m² of visibility in all directions. The Valtra cab is designed for reverse driving with TwinTrac. As always with Valtra tractors, the T Series cab offers a silent workplace (<70 dB).

Technology on demand

Most of the technology is available at the touch of a button. By pushing the ECO or U Pilot button, or engaging the transmission modes, the tractor handles itself automatically. AutoGuide works with cm/dm accuracy and is viewable through the optional 12.1 inch terminal. AgCommand telemetry is available factory fitted and ready to use when the tractor arrives on your farm. Everything is integrated under the same service and warranty. We concentrate on the technology so you can focus on your work.

IT'S NOT HOW MANY
FEATURES WE PUT
INTO IT THAT COUNTS.
IT'S HOW MUCH YOU
GET OUT OF IT.

Form follows function: this is the cornerstone of our design philosophy. The T Series highlights perfectly the way we think. It's functional, yet easy to operate and exciting to look at. Every detail is designed with a purpose in mind: to improve productivity and minimise the total cost of ownership.

Intelligent frame

With its long wheelbase, 2995 mm, the T Series gives good stability and a steady ride. This tractor also reaches a new level of agility, with a turning radius of just 5.25 m, thanks to the narrow engine construction, integrated front linkage and front PTO. At the same time, the frame structure enables us to design the bonnet in a way that improves visibility. While the T Series has a high ground clearance of 60 cm, the cab sits lower, making this the most compact 6-cylinder on the market.

For heavy lifting

The T Series is excellent for maximum grip thanks to its front/rear weight distribution of 40%/60%. The cast front loader sub-frame is fully integrated with the frame structure. The integrated front lift gives you the highest lifting capacity on the market, 51 kN in front and up to 95 kN in the rear. The unique 890 mm lift

height makes it easy to work with implements. Both a three-speed, electrically controlled PTO and a Ground Speed PTO are available for your Valtra T Series.

Versatility concept

Select the horsepower, the hydraulics, and the gearbox you need. Then select the options required for your work. We build tractors that give you unmatched flexibility. This is the ideal tractor for arable farming, with power on the ground and seamlessly working engine and transmission. For dairy and mixed farms we provide a wide range of options for mowing. This is the best solution for a contractor doing heavy front loader work, thanks to hydraulic assistant. For forestry work, you can choose underside protection and a high-capacity hydraulic pump. All options come factory installed and are covered by the factory warranty.

T Series / 155 - 250 hp

It's not just good looking, it's also good working.
Every detail has been designed to make this tractor
easy to drive and easy to own.

**WHERE WE COME FROM,
WE MAKE OUR OWN ROADS**

When we designed and developed the T Series tractor, there were no roads on the map. We had to make our own way. We designed and built the chassis and transmission in-house. And we have been working with AGCO Power engines as long as we have been making tractors – for more than 60 years.

Starting reliably since 1951

You have your choice of 6.6 or 7.4 litre engine, producing between 155 and 250 horsepower and up to 1000 Nm. AGCO Power has been the heart of Valtra tractors since we started manufacturing agricultural tractors in 1951. This gives Valtra tractors the reliability and long service interval that the competitors keep as their benchmark.

THE BEST TRACTOR ENGINE, MADE IN FINLAND

We lowered the total cost of ownership by reducing fuel consumption and emissions to meet Tier 4 Final / Stage 4 engine regulations, while still delivering power where you need it. At the same time we have focused on keeping maintenance to the minimum, with SCR only emissions control.

SCR only

We like to keep things as simple as possible. We have been on the market with SCR emissions control since 2008 and now we are really seeing the difference. SCR is a reliable and service free system, with no clogging components or wearing parts. DOC and SCR catalysers clean the exhaust gas without particle filters.

Right sizing saves fuel

You get good responsiveness and fuel economy throughout the rpm range with the T Series' new turbo and 2000 bar injection pressure. You reach max torque at 1500 rpm. The T Series lowers fuel consumption with a new cooling package, a high pillar air intake, electronic viscous fan control, and optimised heat removal.

Valtra EcoPower

With the Valtra T174 EcoPower model you can choose between two engine settings at the flick of a switch and minimise fuel consumption. The engine torque increases and the average piston speed is reduced by 20 percent. This not only reduces engine wear; it also means fuel savings of up to 10 percent. Idle speed is only 650 rpm.

The Sigma Power boost

The Sigma Power feature gives up to 15 additional horsepower for PTO work when required. Sigma Power is especially useful when you are working with implements that demand a lot of PTO power, such as chippers, mowers, and power harrows.

Market leading hydraulics

The Valtra Direct, Versu and Active models offer high-capacity load-sensing hydraulics with 115 or 160 l/min hydraulic pumps. There are separate oils for the transmission and hydraulics, up to seven service valves in the rear and three valves in front. In Versu and Direct the valves are fully adjustable, with electronic control using the Valtra Arm. In Active the rear valves are mechanically controlled with the ergonomically located, clearly marked levers. The front valves, for the front loader, front lift or both, are electronically controlled with the joystick on the Valtra Arm in all models.

THERE IS NO TRYING. JUST DOING.

These transmissions represent the new generation of power delivery. They shift usability and performance to the next level.

ACTIVE

Valtra Active offers revolutionary powershift technology with mechanical load sensing hydraulics, hydraulic assistant, and separate hydraulic and transmission oils. The transmission control is automated. You can operate the tractor with the gear lever in automatic mode or manual mode.

- Powershift, with load sensing hydraulics
- Mechanical hydraulic controls
- Valtra Arm without screen

VERSU

Valtra Versu is the king of new generation of powershift transmissions, with electronic hydraulic control, hydraulic assistant, and separate hydraulic and transmission oils. The transmission control is automated. You can operate the tractor with the gear lever in automatic mode or manual mode.

- Powershift, with load sensing hydraulics
- Electronic hydraulic controls
- Valtra Arm with screen

DIRECT

This is the flagship of the new T Series range. Four transmission ranges offer optimal working performance and fuel economy. The drive level control allows you to adjust the acceleration and deceleration with your right hand only. The drive lever control systems have been further developed to offer a manual transmission control which may be needed for special applications.

- CVT, with load sensing hydraulics
- Electronic hydraulic controls
- Valtra Arm with screen

The Powershift revolution

You're in control, without your foot on the clutch pedal. With automatic mode control, the transmission shifts up and down depending on how you press the drive pedal. The Active and Versu Powershift transmissions now include the new Hill-hold feature, so you control the tractor start/stop with the brake and accelerator pedals only when starting on a hill. The Valtra Active and Versu models gain hydraulic assistant, so you automatically get increased hydraulic flow with increased engine rpm, without affecting your driving speed.

Maximum CVT power

The Direct (CVT) transmission offers you maximum precision for heavy-duty PTO work. The four transmission ranges are designed to match your tasks perfectly at each working speed. There are 3 driving modes. The default driving mode is with the pedal (automatic), where the driver sets the target speed with the drive pedal. In lever mode (automatic) the driver sets the target speed with the drive lever. In manual mode the driver can separately set the engine revs and manage the driving speed independently with the drive lever. The Direct transmission always provides high-capacity hydraulics and ease of use.

Powershift transmission offers four ranges, two creeper ranges and 30 speeds in both directions. The new gear lever, with manual and automatic modes, makes shifting effortless and precise. The load-sensing hydraulics and hydraulic assistant make the T Series the greatest powershift tractor ever.

UNIQUE VALTRA OPTIONS

Valtra is famous for the A la Carte ordering system. You can tailor your tractor together with your dealer using the electronic ordering tool. This is how we guarantee that you will get the working machine that matches your needs exactly. For the most demanding requirements, we also offer the Valtra Unlimited service, where you can find more options and make your tractor even more individual – Valtra is the only tractor manufacturer to offer this level of service.

1. **TwinTrac** / Rear driving controls for reverse driving
2. **AutoComfort** / Luxury pneumatic cab suspension
3. **AIRES+** / Pneumatic front axle suspension
4. **Premium audio system** / Hifi stereo with subwoofer
5. **Premium working light options** / Excellent visibility for night work
6. **Sigma Power** / Gives an extra 15 hp for PTO work
7. **Roof window** / Best visibility for front loader work
8. **Safety cameras** / Give unimpeded view behind the tractor or implement
9. **Refrigerator** / To keep your refreshments cool
10. **U-Pilot** / Headland management in Versu and Direct
11. **Valtra Evolution seat** / Luxury seat with air conditioning and air suspension
12. **Passenger seat** / Plenty of room in the cab for a co-driver
13. **Front loader** / The best visibility and hydraulics for loader use
14. **Tyre options** / A wide range for any type of work
15. **Toolbox** / Keep tools safe in a lockable service compartment
16. **Mechanical cab suspension** / For smooth driving
17. **Customer name** / Advertise yourself or your business
18. **7 standard colours**
19. **Front PTO**
20. **Front Lift** / 5.1 tonne lift capacity for heavy duty applications
21. **270° sweep wiper** / For good visibility 365 days a year
22. **50 km/h** / Up to 53 km/h at reduced engine rpm
23. **Weights** / Front, rear, rim and ballast
24. **Valve packs (2-5)** / To meet all implement needs
25. **Power Beyond** / Max capacity up to 150 litres/min
26. **Hydraulic capacity** / of 115/160 litres/min
27. **Trailer hitch options** / Pick-up hitches and towing frames
28. **QuickSteer** / Adjustable steering speed makes turning easy
29. **Electric power supplies** / available for all needs
30. **Front service valves** / Flexible use for front implements

IT DOESN'T START WITH TECHNOLOGY. IT STARTS WITH YOU.

The new T Series makes it easy to utilise Valtra's latest technological solutions in order to further improve the productivity and profitability of your farming or contracting operations. Valtra is actively developing precision farming technologies as part of its FUSE strategy. One example of the user-based design of these technologies is that FUSE is an open system that can be used together with the machinery, products and applications of other manufacturers. This allows you to manage data from all the machinery and equipment on your farm so that the entire production chain is part of the same system. FUSE also makes the T Series compatible with future technologies.

ONE SYSTEM FOR YOUR ENTIRE FARM AND ALL YOUR MACHINERY

T Series / 155 - 250 hp

AGCOMMAND

Your tractor should be ready for use whenever needed. Electronic diagnostic tools combined with our dealer expertise ensure that downtime is minimised by means of advance planning. AgCommand™ telemetry allows you to monitor your tractor and the tasks it is performing at any time. Predictive maintenance, fault reports and work performance reports can also be managed with AgCommand. This allows you to influence directly the performance of your drivers and tractors.

AUTO-GUIDE 3000

Auto-Guide 3000™ is Valtra's automatic steering system that is already used on thousands of tractors. The advanced system helps save time, fuel and material while reducing variations in performance among drivers.

T Series tractors are compatible with AgCommand and Auto-Guide 3000, and both can be fitted at the factory ready for use on delivery to the farm.

The AgCommand telemetry system is a key part of Valtra's FUSE strategy. Key data about all the machinery on your farm, including engine data, location and operating hours, can be accessed almost in real time from your computer or smart phone. This makes it easier to plan the logistics of large farms and to monitor work performance. In addition, detailed service information can be sent to your local dealer, who can then anticipate servicing needs and reserve time to ensure the optimal performance of your machinery.

AT YOUR SERVICE, AROUND THE WORLD AND NEAR YOUR FARM

It is extremely important for us at Valtra that your tractor remains reliable and in good working condition year after year. In addition, as part of the world's largest agricultural machinery manufacturer AGCO, we can offer services that help you manage the entire production chain and maximise the output and results of your work.

YOUR VALTRA DEALER

Each Valtra dealer represents the best tractor and implement expertise in the world. They understand both the technical aspects of your tractor and the challenges you encounter in your everyday work. You can always turn to your dealer and receive the best service, whether you are interested in additional services or equipment, maintenance, spare parts, selling your tractor or ordering a new one. Each Valtra dealer is an independent entrepreneur just like you who works continuously to develop both his own operations and those of his customers. AGCO audits its dealers each year to ensure that you get the best possible service.

FLEXIBLE FINANCING SOLUTIONS

AGCO Finance is a fast and safe option for financing the purchase of your next tractor. Financing is tailored individually based on your cash flow and operations. We offer

flexible payment methods according to your needs, and we take seasonal variations into consideration when planning payment schedules.

VALTRA PREMIUMCARE

Valtra PremiumCare allows you to anticipate flexibly the maintenance costs of your investment so that you can better manage your running costs. Regular maintenance and a full service history help maximise the resale value of your tractor. Valtra PremiumCare also lets you minimise the lifecycle costs of your tractor. In addition, Valtra PremiumCare can include up to a five-year or 6000-hour extended factory warranty. The Valtra dealer service calculator will allow you to standardise your maintenance costs all the way up to 10,000 operating hours. Valtra PremiumCare is available with all Valtra models.

SPARE PARTS EVEN ON THE NEXT DAY

Valtra's comprehensive spare parts service supplies the parts you need as fast as by the next morning. This helps you keep your tractor productive in the midst of the busy ploughing and harvesting seasons. The AGCO Parts label ensures that you are getting original Valtra spare parts that have been thoroughly inspected and tested.

PROFESSIONAL MAINTENANCE SERVICES

As a Valtra owner you have access to the Valtra service network. Our skilled technicians are experts in all Valtra tractor models, including the newest technologies and the latest features. Even if you do not opt for Valtra PremiumCare, having your tractor serviced regularly by Valtra-approved technicians ensures that your tractor will continue to perform well even during the busiest seasons. In addition, the resale value of your tractor will remain high.

MY VALTRA

When you purchase a Valtra T Series tractor, you become part of a global online community that we call My Valtra. Here you can ask for advice, share working life, send photos and videos, and relate your experiences among other Valtra owners in over 50 countries around the world. www.myvaltra.com

VALTRA TEAM

Valtra Team is our customer magazine which is published twice a year. Each issue contains useful information about the latest innovations, including the newest and most efficient work methods. You can also access the magazine's archives on the internet and read the articles that interest you most dating back to 2000.

AGCO ACADEMY

Tractors and related technologies, especially precision farming technologies, are developing at a rapid pace. The Valtra Academy continuously trains Valtra dealers and service technicians. In this way you can be sure that you always receive first-class and up-to-date expertise from your Valtra dealer and service technicians.

VALTRA COLLECTION

The Valtra Collection offers high-quality clothing and accessories for work and leisure. The materials and details are carefully selected according to the type of clothing. For example, the newest collection of work clothes features light yet extremely durable materials. Style has not been overlooked, as the clothing reflects Valtra's modern design language.

KEY ACCOUNT PROGRAMME

Some of the world's most successful professional farmers are feeding the world with AGCO equipment. Join us, and add your name to a growing group of dedicated, forward-thinking and profitable farmers. With your help, we can change the face of farming. Together, we can meet the challenges ahead and increase productivity in a sustainable, profitable way.

AGCO - LEADING THE WAY - FEARLESSLY

We are one of the world's most influential producers of farm machinery – a leader in product development, a leader in technology and a leader in customer service.

AGCO is the world's largest manufacturer focused purely on agriculture. Our high-tech solutions and vast experience of global agriculture mean AGCO is uniquely placed to increase your farm's productivity.

AGCO meets individual farming needs. From the most demanding challenges to everyday tasks, our multiple brands and customer-focused services enable us to give you exactly what you need, when you need it.

AGCO's global presence ensures that professional farmers worldwide have the tools they need to maximise their crop yield and meet growing demands.
